

A Free Service For Small Business

Would your business benefit from free, independent advice and assistance to identify your strategic business aims and objectives and advice on how to implement a skills development program that will assist you in achieving these objectives?

Mentor Professional has been selected as one of the service providers to deliver *Skills for Growth: the Workforce Development Program*, a Victorian Government initiative. The program provides small and medium businesses with access to independent specialists who will work with you to identify your goals and then provide a training plan to ensure your employees have the skills to help you realise those goals. The specialist will work with you to develop a workforce training and development plan and facilitate the placement of your staff into vocational training.

The benefits to your business and staff include:

- **Increased business efficiency, innovation and ability to identify opportunities to grow your business**
- **Skills based training that meets the needs of your business and employees**
- **Developing and applying expertise across your business and services.**

At Mentor we have business specialists who will be able to assess the current skills level of your existing workforce and identify opportunities for skills development and vocational training. We can also facilitate the placement of your staff into training courses and in some cases your staff may be eligible for subsidised training through the Victorian Training Guarantee.

Maximise your business opportunities and take up the **free** Skills for Growth Program by calling Mentor and finding out more.

You can also visit our website www.mentorhr.com.au and follow the links to Skills for Growth for more information.
